Hi Carolyn, Laura, Karen, and Tom,

Laura thank you so much for forwarding my message to Carolyn, Tom, and Karen. I'm sorry I didn't think to add the three of you as CC's. I will make sure to cc all of you on my communication with the SRWRS team (unless individuals request otherwise) from now forward. I attached the meeting notes that Anna Fock sent out. There are two projects I know of, BDCP and SRWRS, that have multiple Water Division office involvement as well as ERO and ORC. I am not the lead WTR8 staff person (I don't think we have one) on BDCP but may attend meetings if they are in Sacramento for WTR8. I may be the lead WTR8 person for SRWRS as it moves through the 404 program, undecided at this point.

It would be useful to have an internal EPA meeting regarding this project and then extend that discussion to Corps and FWS.

Thanks. Would be interested in the meeting summary at some point.
Looks as if our previous list of NEPA activities is a bit compartmentalized.
I actually was sitting next next to Mona yesterday during a Science Conference talk on BDCP -- may see her again today.

Re: SRWRS 404 Pre-Application Meeting summary for your review

Hi Anna,

Thank you for taking and sending out meeting minutes from the SRWRS 404 pre-application meeting. I wanted to follow up with the name of the EPA employee who has been working with BOR on the NEPA document. Laura Fujii (Fujii.Laura@epa.gov) works in our Environmental Review Office and will be reviewing the NEPA documents for this project. EPA submitted comments on the Notice of Intent in 2003, see attached final letter (not signature copy). Laura is the primary reviewer of the NEPA documents for this project and will coordinate with other offices as necessary. It is likely that she would work with my office, Wetlands Regulatory Office, for potential comments on Clean Water Act Section 404 compliance. There are detailed comments regarding CWA 404 compliance in the attached letter.

I have one question about the meeting minutes. I don't recall the reason for providing delineations for other projects (see sentence, " If requested, USACE can provide approved wetland delineation in Sacramento and Placer counties" (page 2 3(c)). Does any one recall the context of this comment?

The meeting minutes summarize EPA comments made in the pre-application meeting and our 2003 letter describes our concerns in more detail. One of the things we're concerned about are impacts to waters and wetlands from urbanization made possible by providing water supply. It is my understanding that the projects in western Placer County on the attached map (from Placer Parkway DEIS) are depending on SRWRS for their water supply. Estimating impacts from growth facilitation is very important for NEPA disclosure and LEDPA identification. We may need to have further discussion about this topic. I recommend reviewing the comments in the NOI letter and then letting me know if you would like to discuss them with Laura, myself, and the Corps and FWS if they're interested.

Thanks!

Erin
